

# **Setting up Adobe Illustrator for Laser Cutting and Engraving**

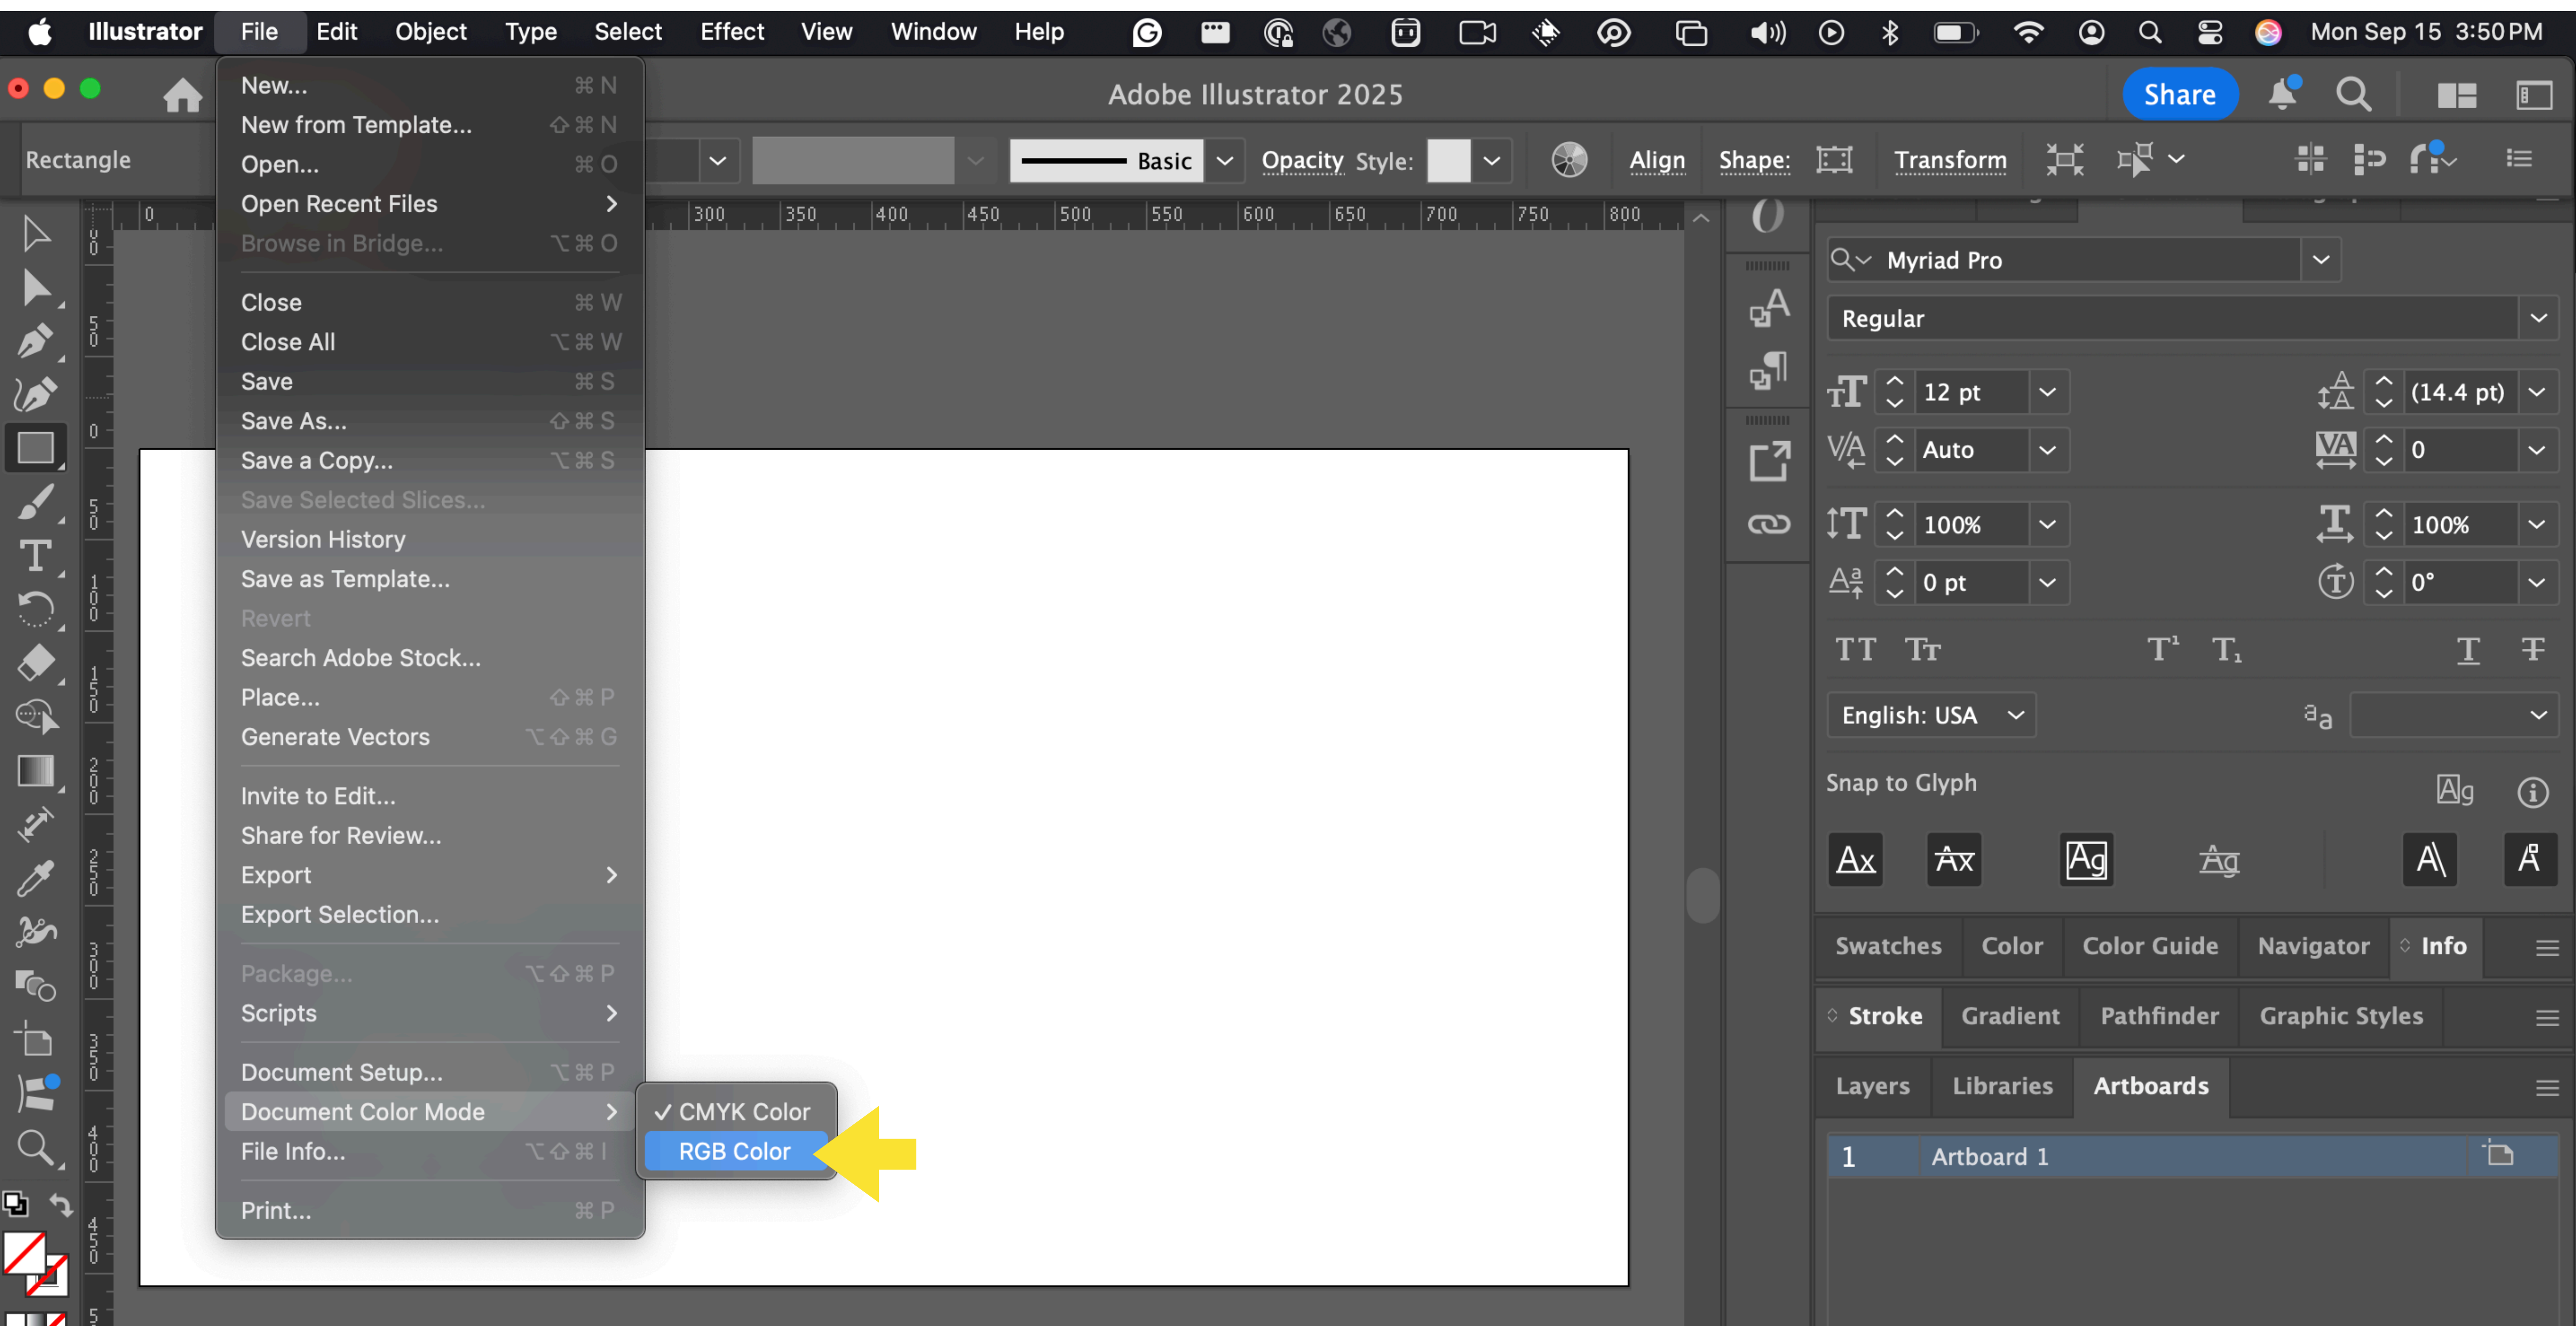

# Step 1: Create a 457.2mm by 812.8mm artboard in Adobe Illustrator

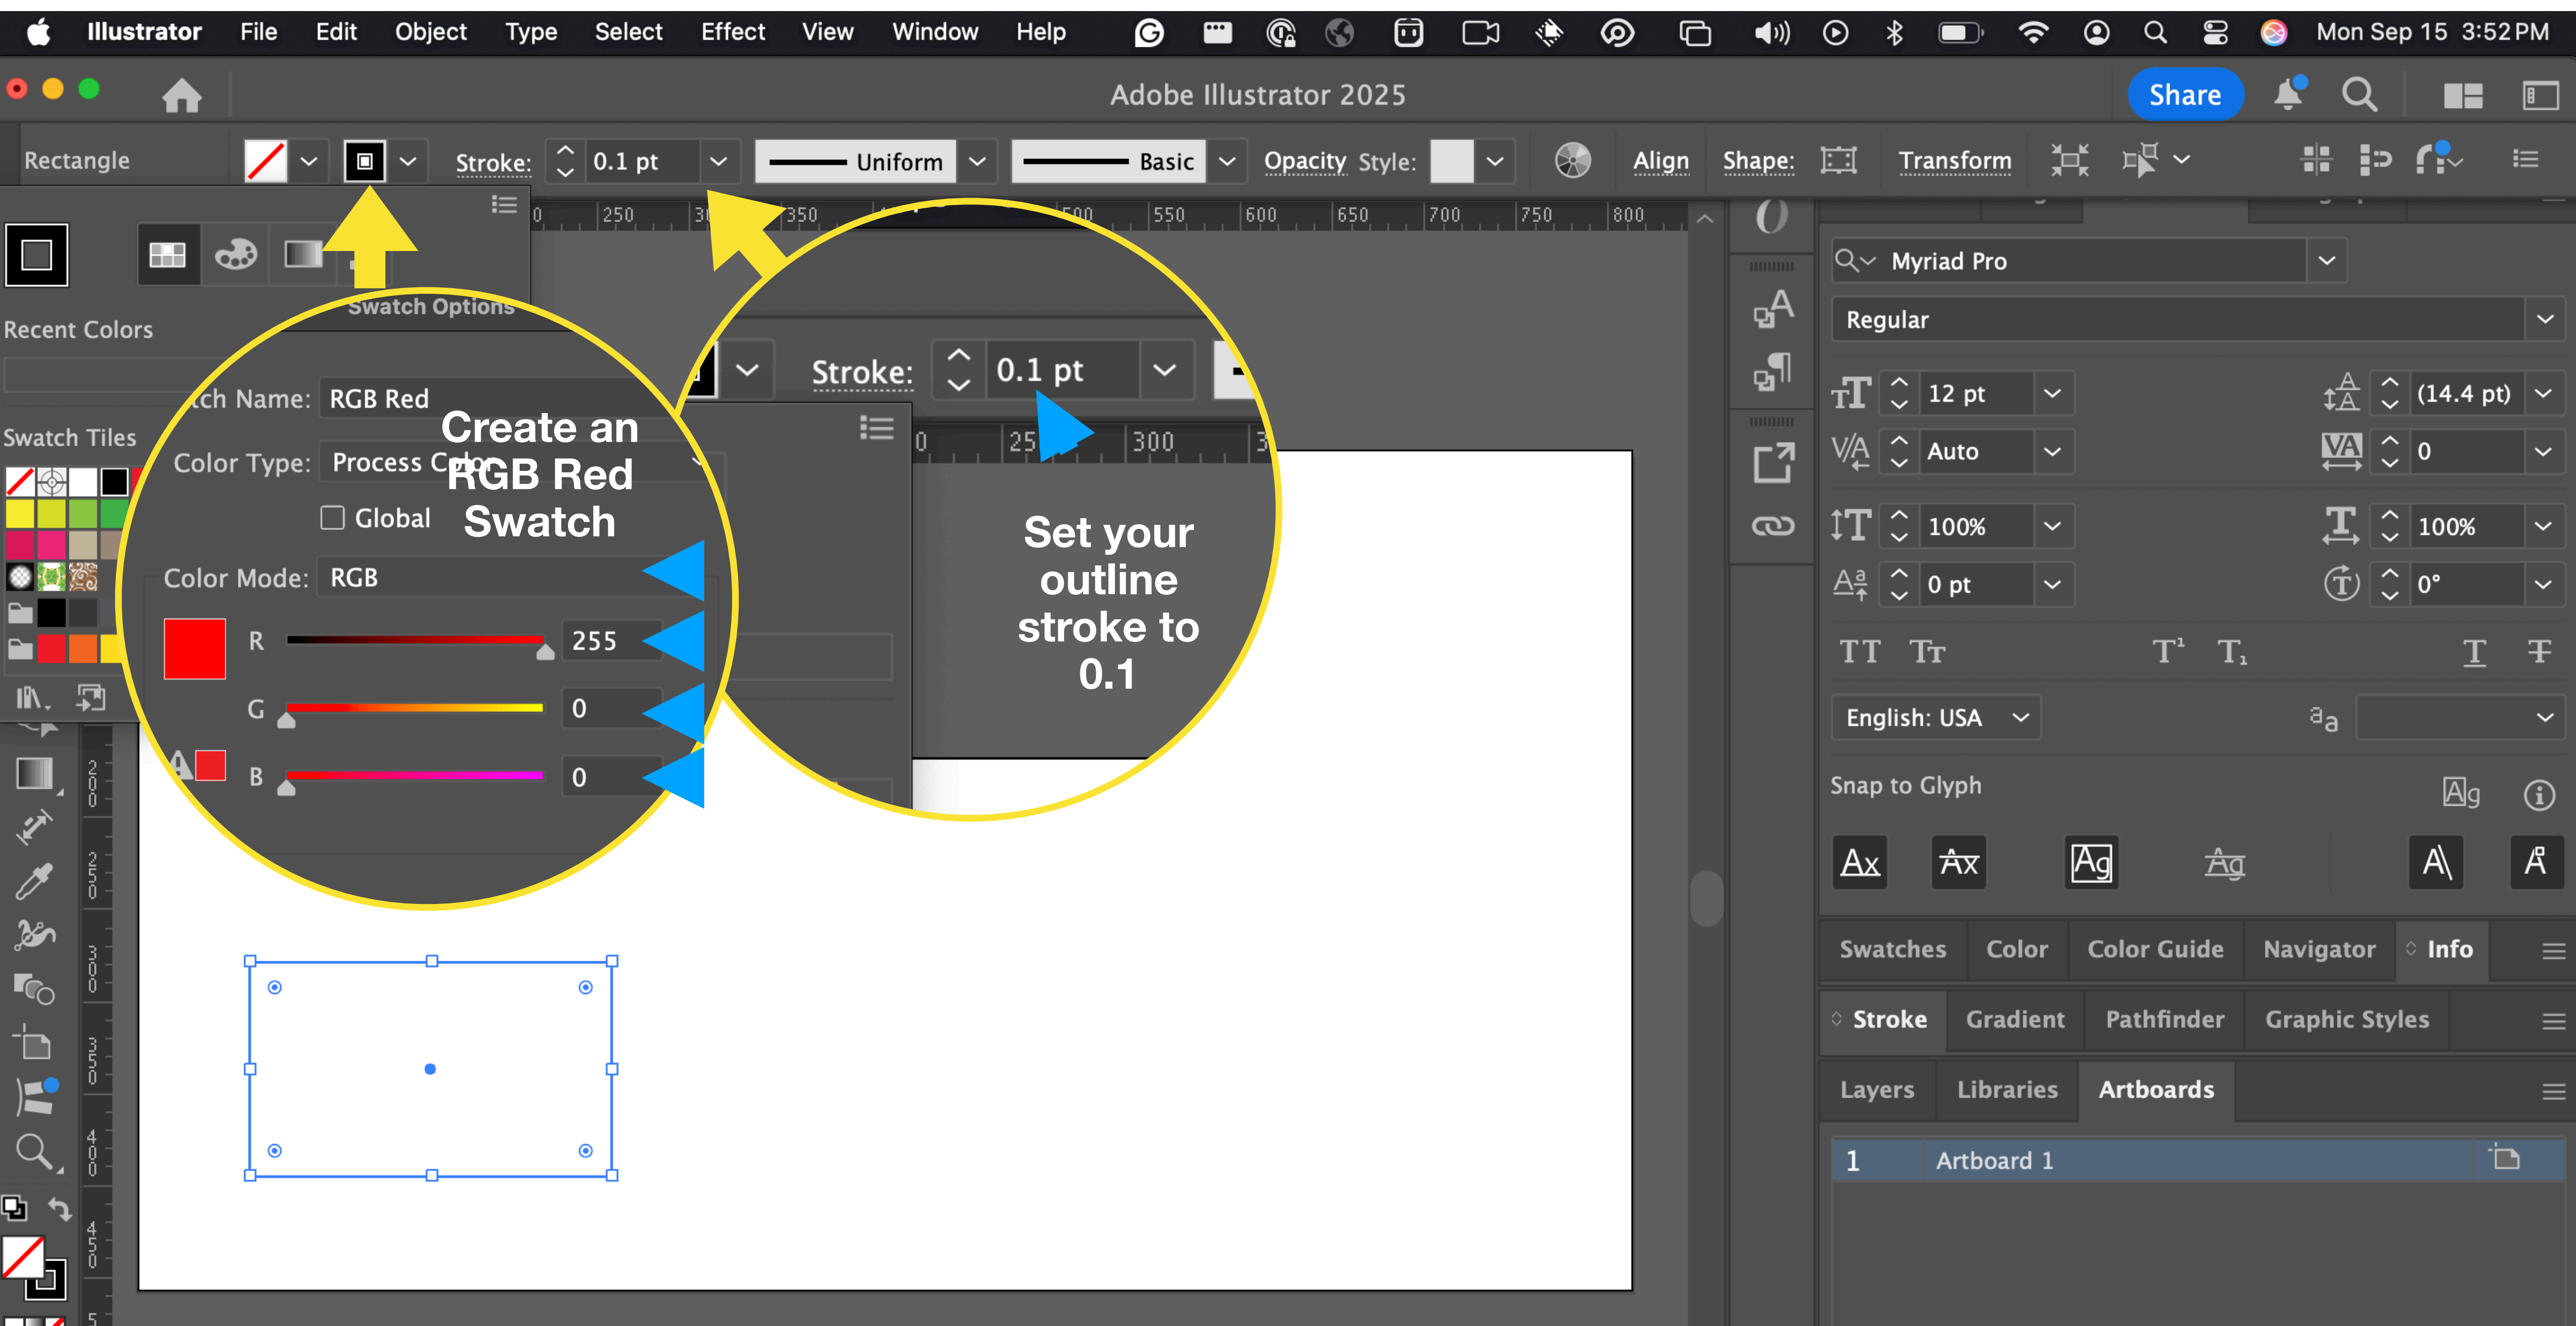

# Step 2: Show Rulers

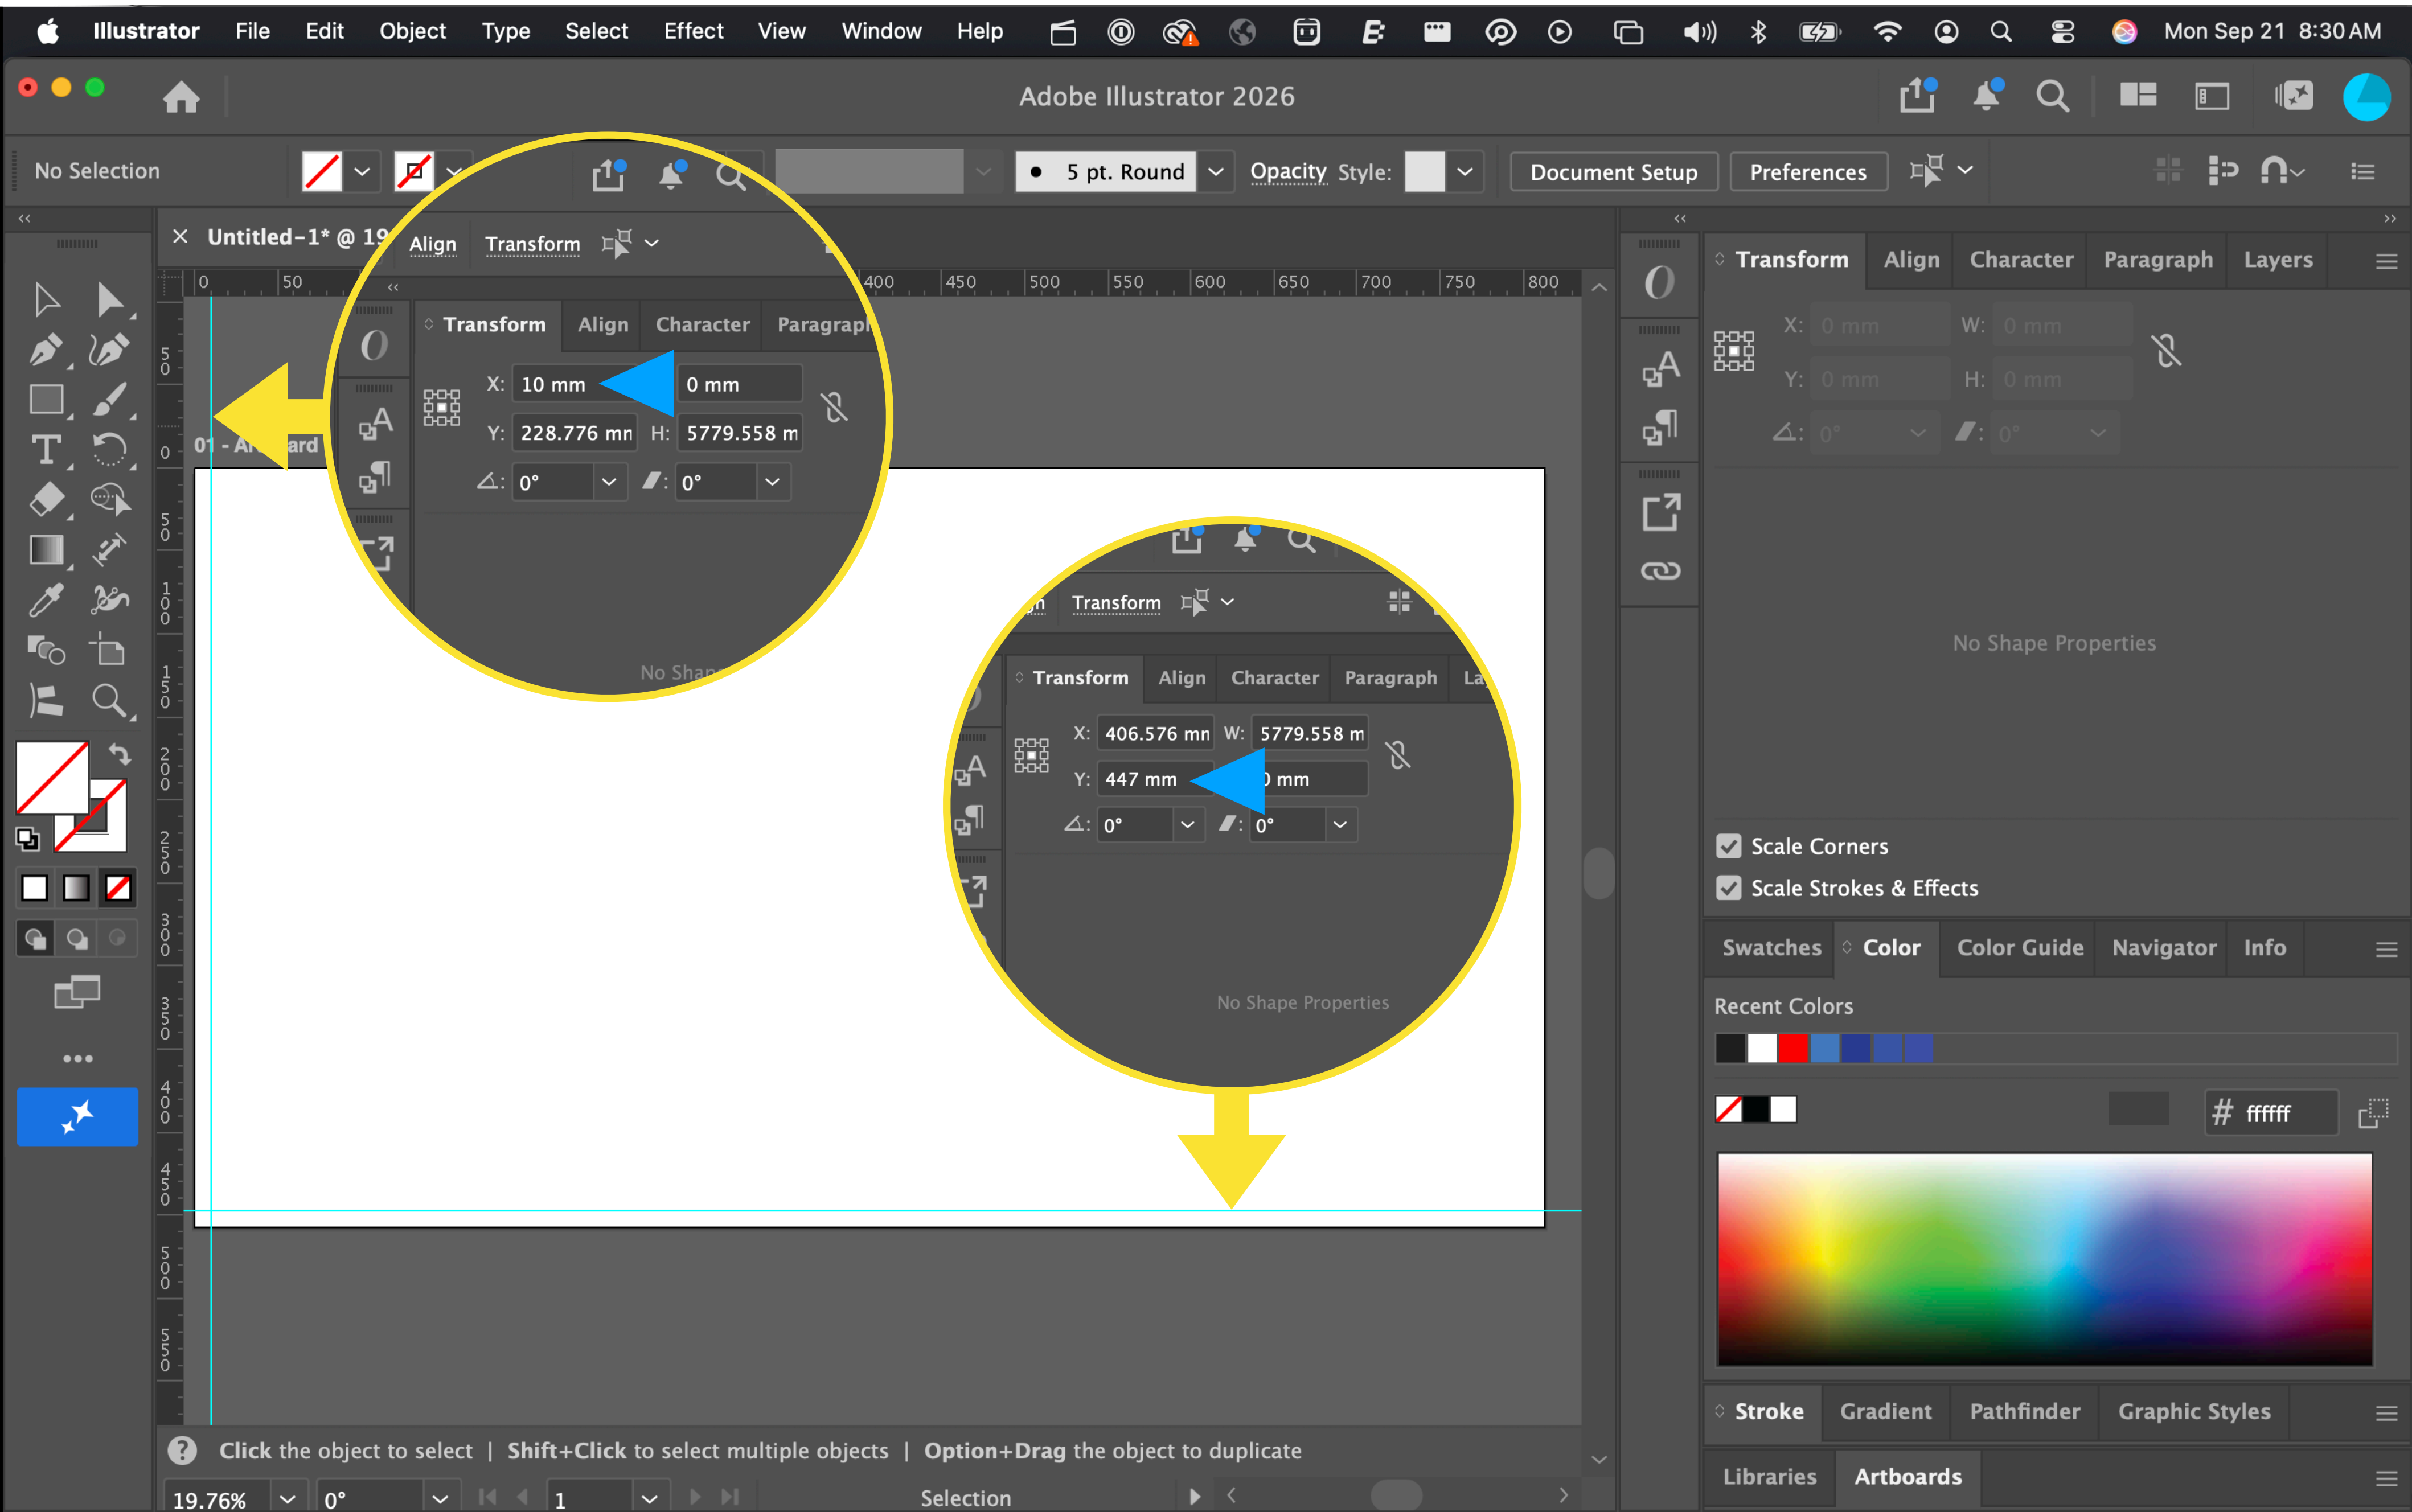

# Step 3: Set your Document Color Mode to RGB Color

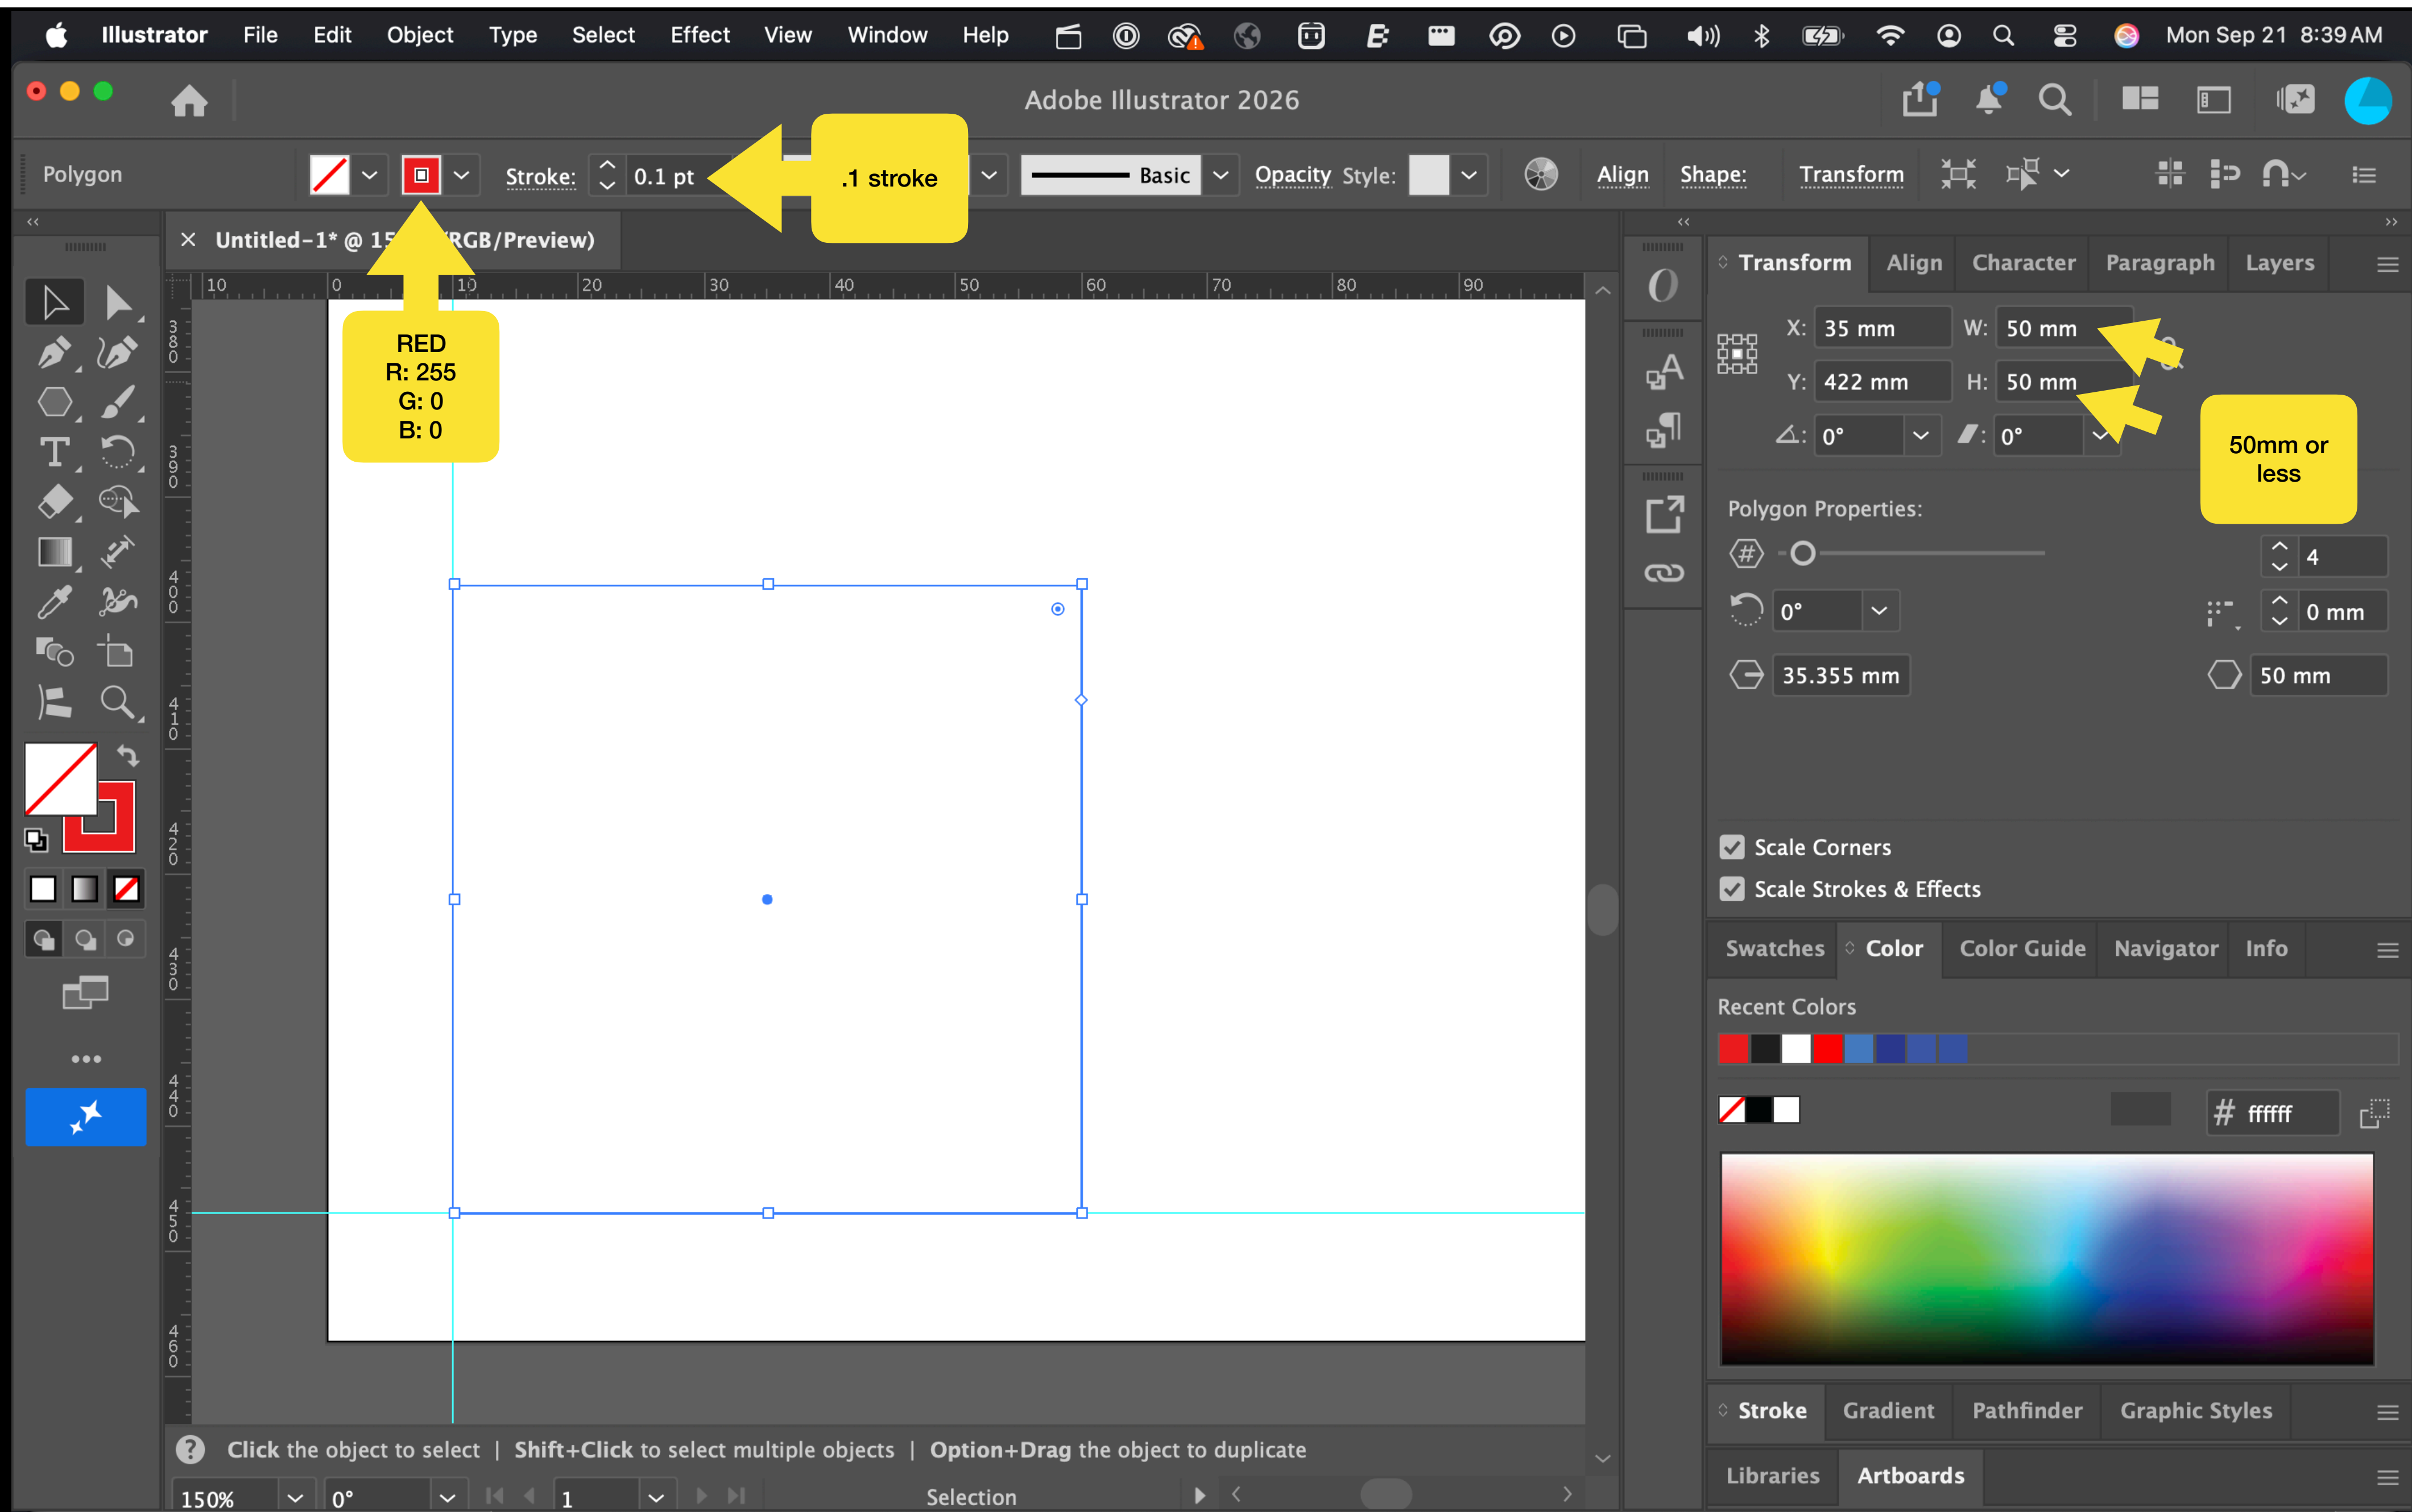

# Step 4 for Cutting: Set your shape's outline color to RED and line stroke to 0.1

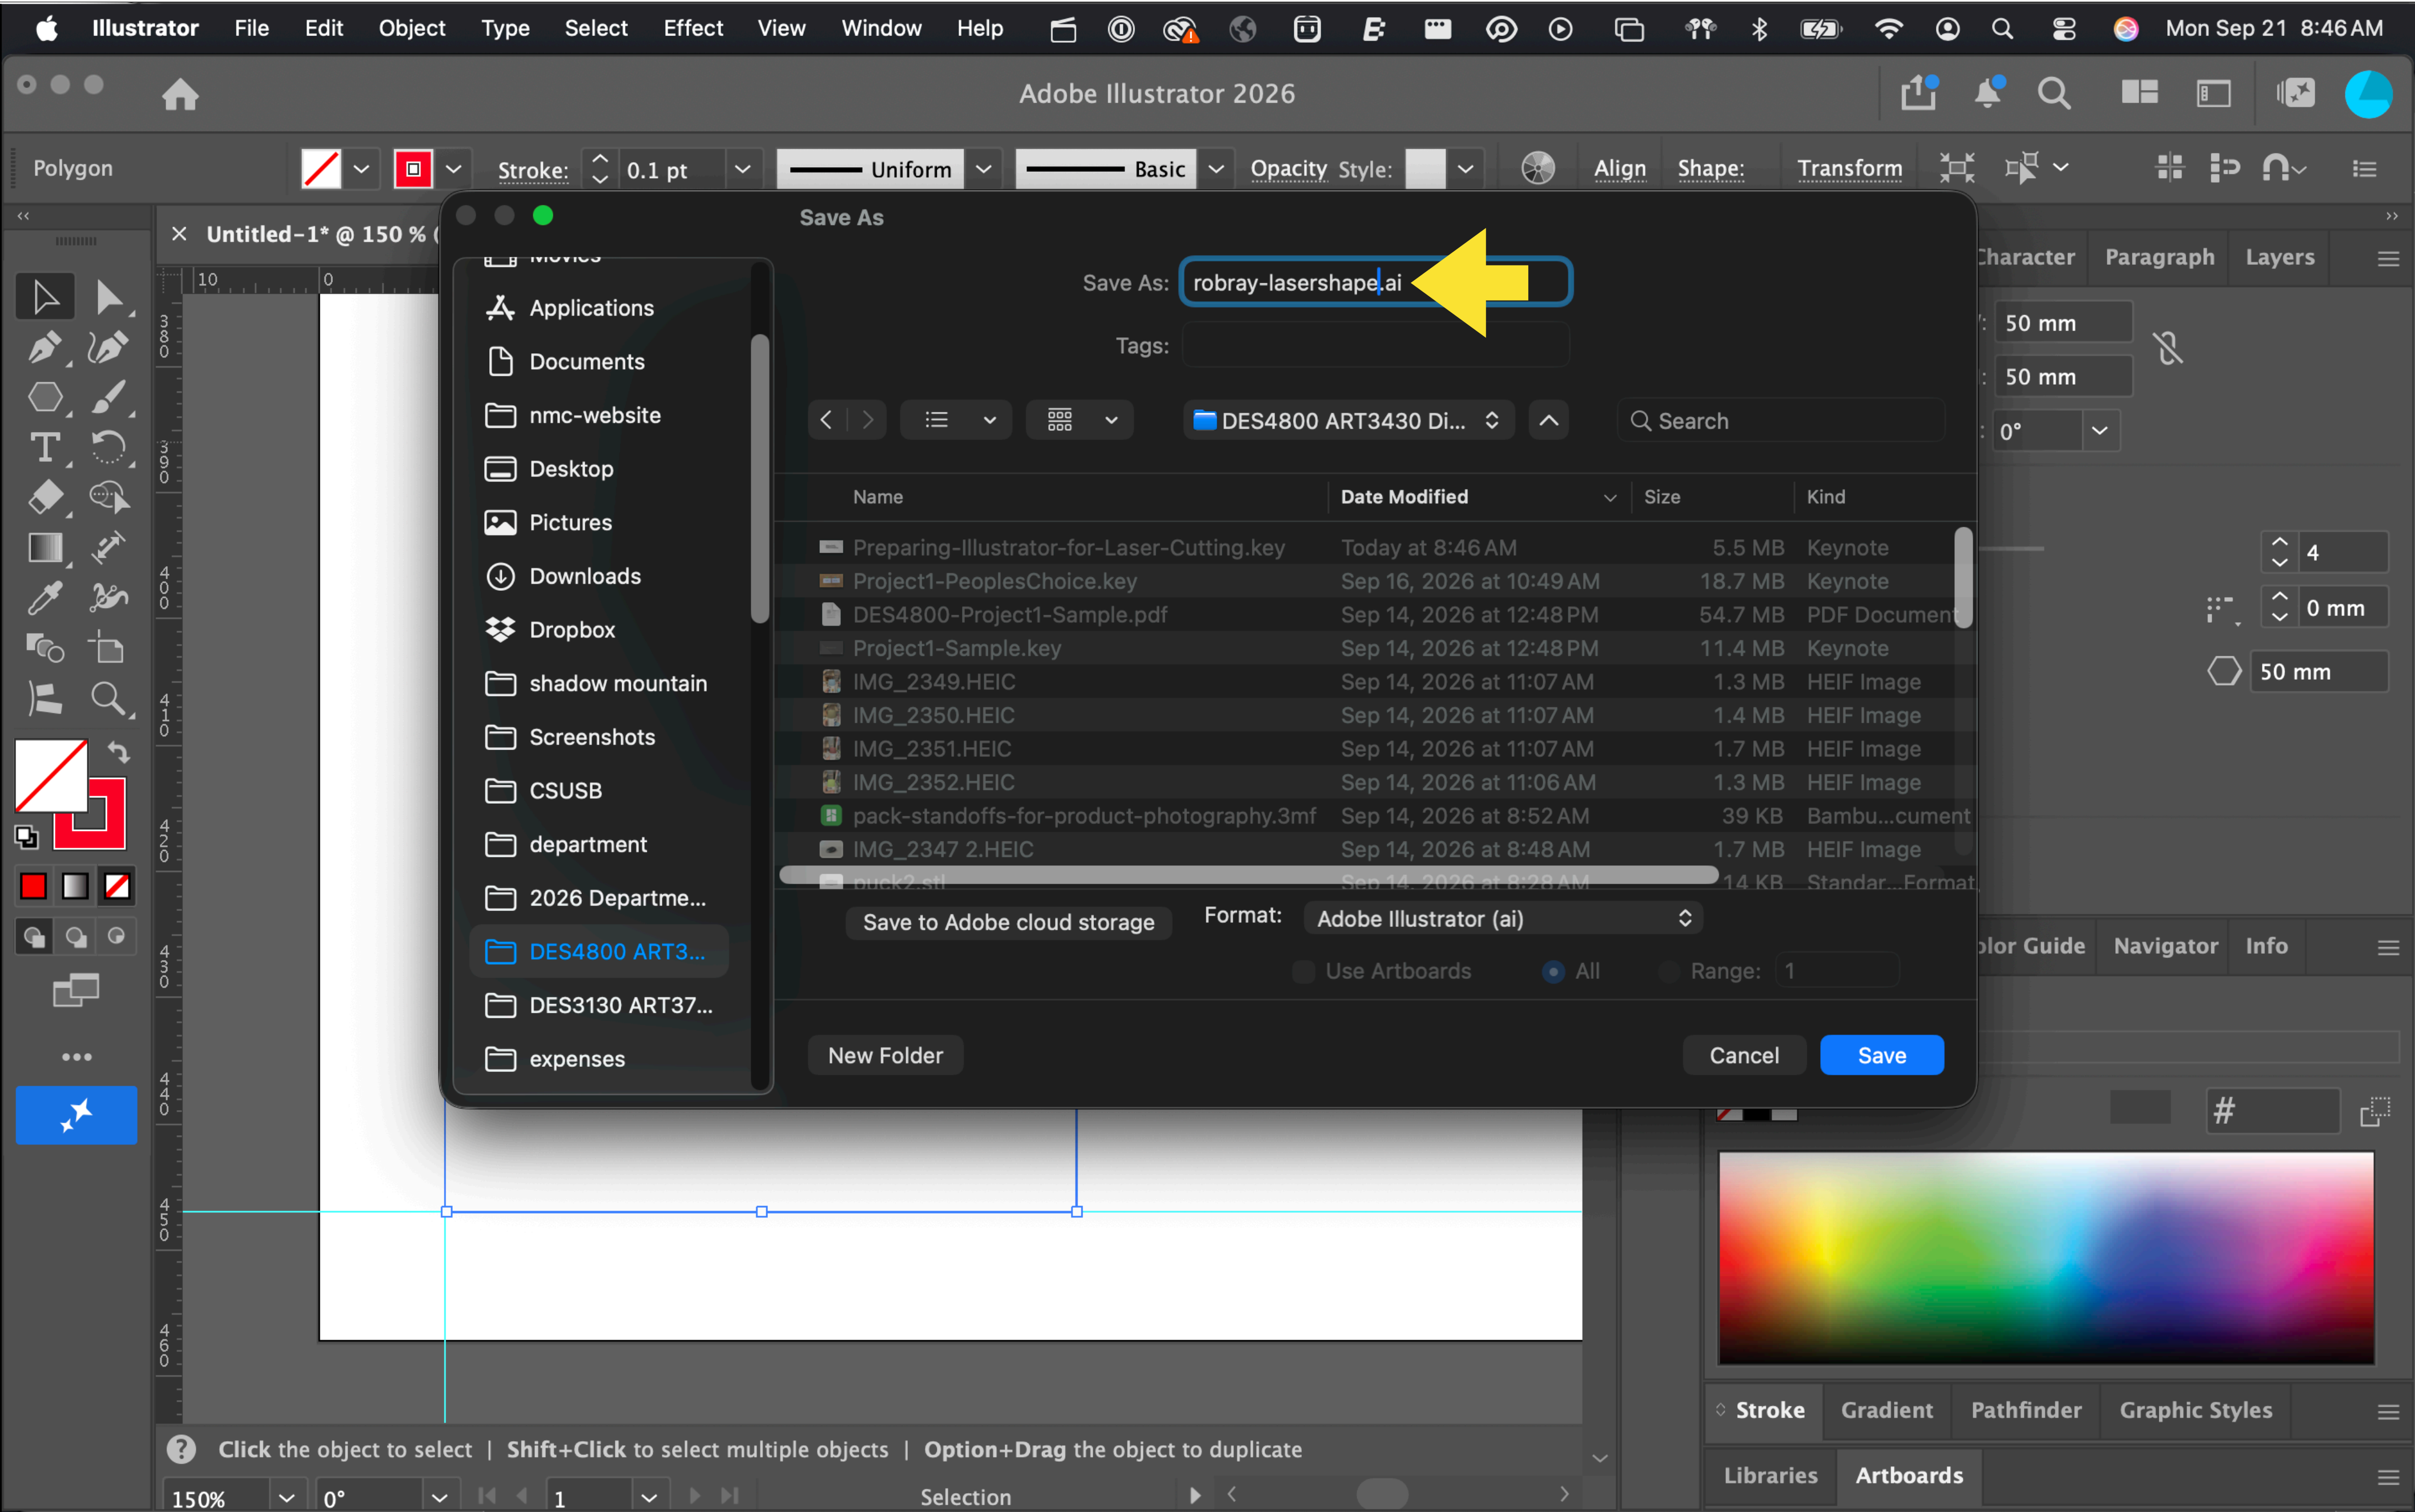

# Step 5 : Set a left guide at 10mm, and a bottom guide at 447mm

# Step 6: Create your shape at lower edge of your guides.

# Step 7: Save your file as *firstname-lastname-lasershape.ai*

**Next, you will print  
this file on the ULS  
laser cutter.**
